Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, 12, and 32-37, drawn to a system for glucose concentration extrapolation, classified in class 422, subclass 68.1.
- II. Claims 13-31, and 38-45, drawn to a system for insulin dose determination, classified in class 514, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Groups I and II, are distinct and different due to their materially different method steps. Groups I and II, are both systems, however each system has different critical features within their method steps: the evaluation device of Group I extrapolates a glucose concentration while the evaluation device of Group II determines an insulin dose to be administered subcutaneously.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1631

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
